LEADING THE WAY IN MOBILITY AND MOUNTING SYSTEMS

MISSION

Our expertise stands in the intersection between engineering and healthcare. Leading the way in mobility and mounting systems for medical equipment, we bring a new level of patient care effectiveness throughout the hospital environment and within telemedicine practice.

VISION

To be a leader and a recognized expert serving the healthcare community worldwide with innovative mobility and mounting systems for medical equipment that improve the efficiency of patient care.

VALUES

UNITY

We are one team. One team with our colleagues, our partners, the healthcare community, and the patients. We are convinced that the sum of the individual forces breaks boundaries.

GENEROSITY

We serve you with passion. We bring all our expertise and knowledge so that everyone benefits from the most advanced engineering solutions in patient care.

DEDICATION

We are dedicated to healthcare. Each of our actions are focused towards making healthcare professionals and patients' lives better.

INGENIOSITY

We create added value. We believe in innovation as the source of evolution of healthcare practices.

EXCELLENCE

We exceed expectations. We strive to bring the best quality to our customers and end users.

A HERITAGE IN HEALTHCARE THAT TRANSCENDS

At Technimount Medical Inc. we understand that healthcare professionals need equipment that make their everyday practice easier. We provide quality solutions which are flexible and easy to use, allowing them to concentrate on what matters most - patient care.

Technimount Medical follows the same path as Technimount System, to continuously innovate to make healthcare practices more efficient and safer. Since 2013, Technimount System has been recognized as the leader in the Emergency Medical Services' industry, setting the standard in safe and flexible mounting systems for medical devices.

With the same mindset, Technimount Medical, an ISO13485 certified company, creates distinctive products that respond to the ever-evolving healthcare practices. Our Technimount Healthcare System™ (THS™) and Healthcare Essentials product lines enable caregivers to move efficiently and safely all the medical equipment, devices and drugs needed to successfully treat their patients, wherever they are inside the hospital or remotely via telemedicine systems.

TECHNIMOUNT HEALTHCARE SYSTEM™ (THS™) OUR INSPIRATION IS THE WOW FACTOR

Premium IV Stands

Modular IV Stands for a Wide Range of Applications

From the light-duty model to the intensive use model that can support numerous IV bags, volumetric pumps or other medical devices, the THS Premium product line offers a full range of options and configurations to meet the specific needs of any care unit. This low-noise, smooth gliding pole is also highly stable thanks to its unique six-wheel base design.

Ergo IV Stands

One-of-a-kind IV Stands that Integrate Ergonomics

The THS Ergo IV Stand has been developed with not only the medical staff but also the patients in mind. The unique-design base of the Ergo IV Stand makes walking with it much easier by providing good stability and adequate foot space. The height-adjustable handle is also designed for a comfortable posture while walking. Now patients can move around the hospital with confidence with their equipments.

Workstations

A True WOW Factor in the Hospital

The slim design of the THS Workstation on Wheels makes it easy to maneuver, yet very stable and versatile. These sit-to-stand height adjustable workstations can be customized according to your needs. It can receive an all-in-one computer, a standard computer set of CPU, monitor, keyboard, and mouse, a laptop or a tablet. The cart can also be equipped with various accessories like drawers and camera for telemedicine purpose.

Meet the Technimount Healthcare System trademark. From premium IV stands to specialized products like docking stations, our inspiration is always there: the Wow Factor.

The THS product line is easily recognizable by its beautiful colors and amazing modular design, but mostly by its premium features and functionalities for a great user experience.

Wall Mount System

Ergonomics, a Must in Any Hospital Room

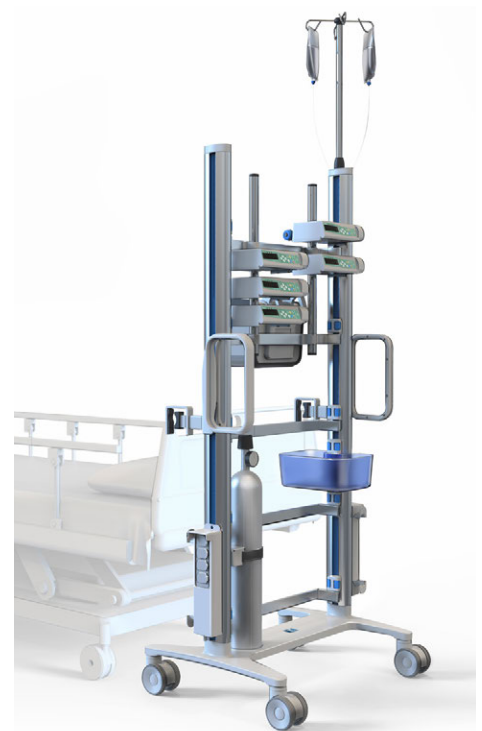

Sharing the same features as the THS Workstations on Wheels, the Wall Mount System is designed to be installed either in an exam room, an operating room, a hallway or a patient room with minimal space requirements. These workstations incorporate essential ergonomic features, such as the possibility of working comfortably while sitting or standing. The arm system is also strong enough to support any 24-inch all-in-one computer.

Medical Device Stands

Specialized Roll Stands for Medical Devices

Designed to bring the right equipment at the right place and the right moment, the sturdy THS Medical Device Cart can securely support specialized medical devices such as ventilators, monitors, defibrillators, or any other medical device with all its gears. Optionally, these stands can also be compatible with Technimount EMS' mounting system for medical devices making the transfer easier from an ambulance to the hospital.

Docking Stations

At last, Intra-Hospital Transfers Made Easy

Moving a patient in their bed from one care unit to another is now easier using the THS Docking Station. Safely attached to mostly any kind of hospital bed, the mounting system of THS Docking Station secures a multitude of operational medical devices and heavy equipment during intra-hospital transfers. Only one caregiver is required to move the patient and their equipment, maximizing the efficiency of staff.

HEALTHCARE ESSENTIALS

HIGH QUALITY FOR ALL

IV STANDS - 100 SERIES

IV Stand -115

IV Stand -120

IV Stand -130

ACCESSORIES*

Integrated Tray Handle

Urinary Bag Hook

Power Bar Holder

Oxygen Tank Holder

IV Stands 100 Series

The 110 Series IV Stands are high quality, sturdy products that offer smooth gliding and ease of use for peace of mind. Most models include a handle with a practical tray for patients' personal belongings. A variety of optional accessories are available to respond to specific needs and remain compatible with current equipment.

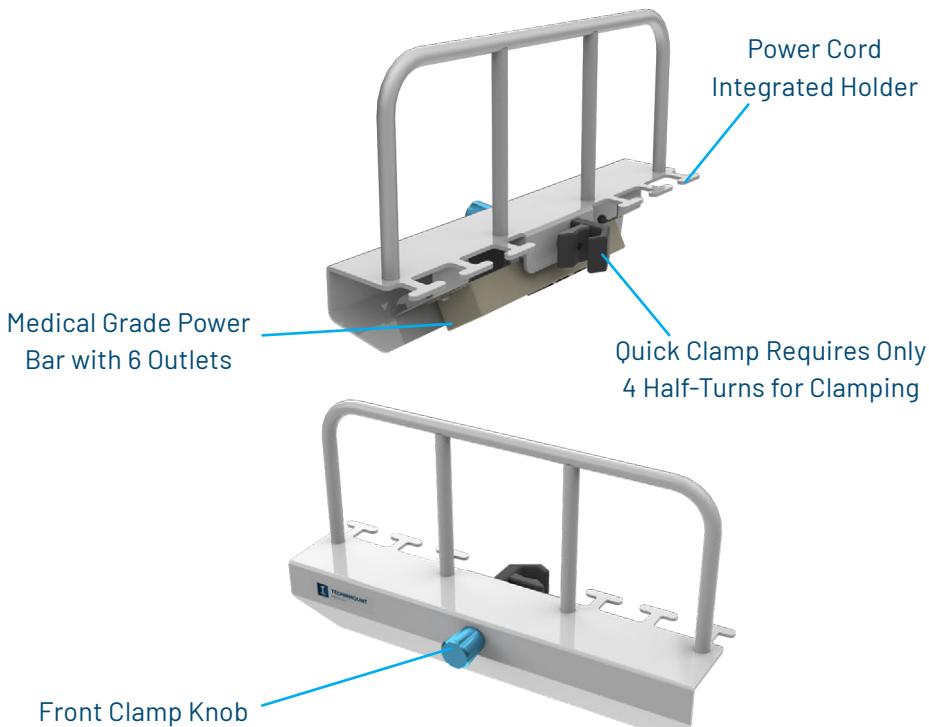

*Other accessories available.

Our Healthcare Essentials product line offers the maximum quality for every day healthcare practices. Combined with Technimount Medical Accessories it provides enhanced flexibility and ease of use.

PUMP CARRIERS - 200 SERIES

4-Device Pump Carrier

Pump Carrier 200 Series

With its innovative Front Knob, Quick Clamp System, integrated power strip and power cord holder, the 200 Series Pump Carrier is a must have. When multiple pumps are needed on the pole, mounting them all at once in a few seconds is more efficient and appreciated by the medical staff. Vertical models are also available.

TECHNIMOUNT SYSTEM™

Technimount System is at the origin of the concept of the unparalleled universal mounting system for medical device management. Its leadership in providing exceptional safety and flexibility to healthcare professionals has extended to its divisions EMS and Medical.

TECHNIMOUNT EMS™

Technimount EMS offers a wide range of mounting systems for portable medical devices, addressing the safety needs of patients and staff during ground or air emergency and critical care transport, establishing itself as a standard in the Emergency Medical Services industry.

TECHNIMOUNT MEDICAL™

Technimount Medical's THS™ and Healthcare Essentials product lines enable caregivers to move efficiently and safely all the medical equipment, devices and drugs needed to successfully treat their patients, wherever they are inside the hospital or remotely via telemedicine systems.
